

## Locate & label circuit breakers

- Keep the area free of clutter and label your switches. To save time, turn on all of your lights then have a friend search for rooms without power after you flip each switch.

## Locate GFCI outlets

- Favor using GFCI protected outlets, they're safer!
- Know which GFCI outlets to reset for each room.

## Locate gas & water valves

- Write down the location and make sure each member of your household can turn them off in case of an emergency.

## Replace smoke & carbon monoxide detector batteries

- Replace smoke detector batteries every 12 months and carbon monoxide detector batteries every 6 months.

## Create maintenance checklist

- Keep up with regular maintenance to maintain the value of your home.
- Clean your gutters, carpets, sidewalk, driveway, and other areas that see frequent usage.

## List home improvement projects

- Prioritize wants vs needs then create a budget. Home Improvements help maintain your homes value.

## Take it all in!

- Be proud! Moving is a stressful process! Make sure you take some time to enjoy the fruits of your labor.
